## (ARCHITECTURAL COLUMNS)

**FORMS AND FUNCTIONS**

1602 Mizell Road,  
Tuskegee Al 36083

- # From the ancient times the symmetry in architects is the significant part. Columns provide not only the magnificence to the structure but also play a vital role for providing the strength with aesthetics; Classical builders like to use them due to the same reasons. These masterly built and masked columns are considered a hallmark of vigor and Strength with a depiction of history and solid prediction of future.
- # Fiblast has blended finest classical designs with state of the art technology by using the advance manufacturing techniques with modern material and meeting the international standards of quality. We produce and offer a complete line of column shafts, capitals and bases. These products are of very high quality and provide matchless structural support and durability.
- # Ease of installation makes our products the best choice for your upcoming projects. We make the installation hassle free; there is no priming required. Our columns can be easily trimmed, drilled painted etc. Detailed installation instructions are available upon request.
